How much plastic is estimated to be in the oceans and where it may be

Notes:

[1] Calculated as 1.4% of all the plastics produced since the 1950s. From Jang et al., 2015

[2] Lebreton et al., 2012

[3] Assuming 66% of the plastic is buoyant. From Jambeck et al., 2015

[4] From Cózar et al., 2014; Eriksen et al., 2014; van Sebille, 2015

Sources: GRID-Arendal own calculations, each source is indicated in the notes
