

Former nuclear test site. Large portion of surrounding areas contaminated.

Nuclear power plant

Power reactor

Active

Closed

Research reactor

Active

Closed

Cosmodrome and rocket launching site. Important environmental impact on the surrounding areas

Uranium mining and milling facility. Radioactive waste related to exploitation

Closed uranium mine

Chemical and biological research center or production plants being dismantled

Radioactive waste storage site generally poorly maintained, and alleged to pose a significant risk to health and environment

Old radioactive waste site (early 20th century)

Fuel production

Non-radioactive waste site (mercury, antimony)

Area of high seismic risk
