hd_indicators.pdf 2007-07-20 13:52:00

This index measures the relative achievement of a country in terms of an individual's ability to reach old age. It is based on established global minimum and maximum values.

The education index uses an adult literacy (weighted two-thirds) and primary, secondary and tertiary gross enrollment (weighted one-third). This index is based on established global minimum and maximum values.

The GDP (Gross Domestic Product) index is calculated using per capita GDP (PPP US$, Purchasing Power Parity) adjusted accordingly to a global maximum value (of US$ 40,000) and minimum value (of US$ 100).
