

1- Lower Ferghana Valley

Water regulation, radioactive waste management, water table rise and local disputes, soil degradation (salinization)

2- Radioactive belt

Poor radioactive waste management and risk of transboundary pollution (air, water, food chain)

3 - Enclaves

Border, land and water disputes, presence of land-mines (making agriculture and cattle grazing dangerous), deforestation

4 - Industrial pollution and chemical risk

Risk of transboundary pollution due to poorly managed industrial and chemicals disposal sites

5 - Land, forests, water and borders

Land degradation and deforestation, water reservoirs and regulation, border and land disputes

Opportunities for transboundary cooperation
