RISKS ASSOCIATED WITH THE REASONS FOR CONCERNS (RFCs)

LEVELS OF ADDITIONAL RISK DUE TO CLIMATE CHANGE

- Very high risk of severe impacts and the presence of significant irreversibility or the persistence of climate-related hazards, combined with limited ability to adapt due to the nature of the hazard or impact
- Severe and widespread impacts
- Associated impacts are both detectable and attributable to climate change with at least medium confidence
- No associated impacts are detectable and attributable to climate change

Assessment of risks at 2°C, or higher are beyond the scope of the present assessment
